Common Elements, Ions, Strong Acids

Name: _____ Date: _____

There will be a quiz on **Monday, September 14, 2020**. For the quiz you will need to know:

- The symbol and name of the elements listed below
- The name, formula, and charge for the ions listed in the tables that follow
- The formulas and names of the seven strong acids

This information is necessary for answering the equation and reaction questions for the AP exam.

Symbols and names of elements with these atomic numbers need to be memorized:

1-38, 42, 47, 48, 50-57, 74, 78-80, 82, 83, 86-88, 90, 92

For the ions, charge, symbol, and name(s) must be memorized:
